September 10th 1958

COORDINATING COMMITTEE

REPORT BY THE CHAIRMAN OF THE SUB-COMMITTEE ON LISTS

ON

ITEM 1510(b)

30th July, 1958

4209040
Sub - C (58)

Present: Germany (Chairman), Japan, United Kingdom, United States.

References: COCOM Documents Nos. 3014.00/1; 3015.00/1 plus Annex A.
and Corrigendum; 3015.00/4.

In the work of identification of specific types of horizontally operated fish and/or whale finding equipment, the experts of the German, Japanese, United Kingdom and United States Delegations agreed that fish finding sets which in their essential characteristics equalled in performance ASDICS should remain under embargo. Only the following types of horizontally operated fish and/or whale finding equipment were found to be below the standard performance of ASDICS.

- (a) German Elac Klein Lodar (fitted with echo-graph units Castor, Bellatrix, Altair).
- (b) Japanese Nippon Musen K.K. Company Simplified Sonar.
- (c) British Kelvin and Hughes Fisherman's Asdic.

This conclusion was reached on the basis of the pattern of use of ASDICS and horizontally operated fish and/or whale finding equipment in the Western countries.
